FRIDAY, NOVEMBER 2, 1934

NUMBER 34

Funeral Services Of William B. Nalder

Funeral services over the remains of W. B. Nalder, who passed away Thursday evening of last week, were held in the Stake House, Monday afternoon at 2 p.m. with C. E. Allred of the First Ward Bishopric in charge.

The singing was under the direction of the First Ward Choir, and the hymns by the Choir were: "My Father," "I Know that My Redeemer Lives" with Bishop J. H. Walker singing the solo, and "I Need Thee Every Hour."

Special musical numbers were Male Quartette, "Crossing the Bar," by F. R. Taylor and C. and a solo by Thos. K. Roberts "One Sweetly Solemn Thought."

The speakers were all long time friends and associates of deceased, who had known him in the early days of the town, and spoke highly of his qualities of honesty, integrity and devotion to family and friends. Thos. O. King, who deceased when he first came to Southern Alberta on a visit in 1893, during which time he rode on a round up through parts of Montana, where he made an impression that lived for years, and which caused men for years after, with whom he came in contact, or that tried to enquire were that "Mormon" boy was. It was fourteen or fifteen years later that he with his family moved to Raymond.

The other speakers were Bishop Harris of Taber, who lived here a number of years ago, and John Green of Lethbridge who was also well acquainted with deceased and his family. Both these speakers eulogized the retiring, exemplary life of deceased, spoke of the beauties and glories of the resurrection and urged all to live worthy and ready for death, as it came unexpected and unwelcome to all of us.

The invocation was offered by Pres. H. S. Allen, and the benediction was pronounced by Jos. Nilsson.

The large crowd in attendance for such a busy season, and the lovely floral tributes spoke volumes of the esteem in which deceased was held amongst his friends and neighbors.

Interment was in the local cemetery, a large cortage of cars following the remains to the cemetery, where Christensen Bros., of Lethbridge had charge of arrangements.

CANADIAN UTILITIES PROVIDES VALUABLE SERVICE

A valuable and unique service provided by the Canadian Utilities Limited, is available without cost or obligation to the people of Raymond if they choose to take advantage of it, and certainly they should, whether they do or not.

Miss Effie Ternan, Illumination Expert, is here, and by calling the Utilities Office, she will come with her personal knowledge and scientific meters, to test and measure the light in your home, and to tell you whether or not your lights are suitable for the colors of your home, and how much of the light you are paying for that you are actually getting.

With everything else, the illumination of homes and buildings has made rapid strides forward in recent years, and here is your opportunity to make the most of what has been learned in this matter. Read the announcement on page three of this issue, and the big ad. on page four, then call 20 and make an appointment for Miss Ternan, to call at your home and "measure your light."

Halloween Party Held

Spook and Ghost a plenty were in attendance at the Second Ward Bee-Hive Girls, of the Rose swarm, Buzz held at the home of their teacher, Millie Romeril on Mon. Oct. 29th. The girls were met at the gate by a ghost who directed them to follow the string which led them around the yard and past many hair raising objects finally arriving at the basement door, where they were directed to enter and go through the spook room. Judging from the shrieks, they received plenty of thrills down there. On arriving in the house the girls were met by an imported witch who told their fortunes. The remainder of the evening was spent in a program and games. Refreshments were served to 26, including the Stake officers Mrs. Lauretta Walton, Mr. L. D. King, and Mrs. M. Boyson. A very enjoyable evening was had by all.

News Notes

W. J. Kraft, and other Safety officials paid the local store a visit Tuesday forenoon of this week.

Board of Trade meeting will be held Monday evening, November 5th, in the Town Hall. All members please take notice and be there.

Hugo Evkner of dirigible fame is in the United States negotiating regular dirigible service between United States and Europe.

We don't know just what it is a sign of, but there seems to have been more auction sales in the past three months than in the previous three years.

A crossing was built over the street on 1st East last Monday. This will be a big asset in weather, and we would like to see more of our streets fixed in this manner.

Workmen started Monday at dismantling the old Castle home just south of Mrs. McCarthy's. This property now belongs to C. W. Brewerton and Sons, and we understand that an up-to-date apartment will be erected on this site.

Telegraph Topic Of Rotary Talk At Raymond

HISTORY AND ILLUSTRATIONS OF LATEST INVENTIONS ENTERTAINING

With an attendance of 50, including 12 or 14 from the parent Club in Lethbridge, Ladies night at the Raymond Rotary Outpost, was a decided success, and will be long remembered by the crowd present, who enjoyed every minute of the illustrated lecture of J. H. Davies, general Superintendent of Canadian National Telegraphs, after partaking of a sumptuous turkey supper, with all the trimmings, prepared by the Ladies Aid, and served in the local United Church.

Pres. T. Geo. Wood of the local Outpost was in charge, and his first announcement was that any man that sat with his wife during the banquet would be fined 50c. Lee Brewerton, Arnold Zabriskie, and the President appointed the crowd to their chairs, and they took good care that they were well mixed up, and the visitors especially were scattered amongst the local people so that everyone got acquainted with everyone else, and had a very enjoyable social hour over the Turkey supper. After everyone had partaken to their complete satisfaction, and the tables had been moved, seats were re-arranged, and the crowd relaxed to listen to the lecture.

James G. Davies, general superintendent of the Canadian National Telegraphs, and a member of the Winnipeg Rotary Club, delivered an informative address to a large gathering at Monday's luncheon of the local Rotary Club, his topic being "The Transmission of Intelligence by Means of Electricity."

Mr. Davies was accompanied by G. A. McDonald, commercial assistant, Winnipeg.

Mr. Davies traced the development of electricity from

1267, when Roger Bacon published his thesis on the 'Loadstone.' The speaker touched on the discoveries of Otto Van Guericke in 1650, Wood in 1726, Stephen Gray in 1729, Lesage in 1774, all marking steps forward in transmission of intelligence by means of electricity. He then dealt with the morris code, as worked out by Professor Morris and the discovery of telephony by Alexander Graham Bell 60 years ago this month.

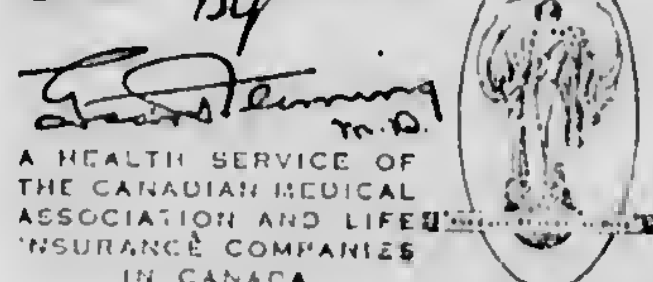

Following his address, Mr. Davies gave an illustrated lecture, the pictures taking one through from the first very primitive instruments to the most modern telegraph machines in the large offices, in the newspaper offices, stock exchanges, in radio broadcasting, stations, and in trains. Incidentally the pictures included scenes depicting the difficulties encountered at times through storms and heavy mountain snowfalls.

A very interesting phase of the most modern development mentioned by the speaker was that on June 1 last the Canadian National Telegraphs inaugurated the first direct cable service between London and Toronto, and on July 16 of this year they inaugurated a ticker service from the Toronto stock exchange direct to the brokers in New York City. The pictures included the latest 24 channel voice frequently system between Winnipeg and Toronto.

Following the lecture and illustration, a number of questions were asked, and a hearty hand clapping expressed the appreciation of the crowd for the splendid lecture they had listened to.

The meeting adjourned at 10:15, and everyone present will look eagerly forward to another Ladies' night, and an evening as pleasant as Monday evening proved to be.

HEALTH

VOLUNTARY ISOLATION

To spread or not to spread, is the question to which isolation offers a partial answer. Isolation is not so well thought of as formerly this is not due to any fault on the part of isolation, but rather to the fact that isolation cannot accomplish as much as was hoped for it at one time.

Isolation, the separation of the sick from the well, has been practised for many centuries. Those who are familiar with the Old Testament will recall the description given of how, in ancient times, those who suffered from leprosy were made to live apart, isolated, from their fellow-men.

Isolation is of real value provided there is a reasonable understanding of what is aimed to be accomplished through isolation; otherwise, it will be largely a waste effort. Isolation is not for the good of the sick person on whom it is practised, who are well.

Frequently we have repeated the advice that when a child has a cold or sick stomach, or ach, or if he is coming down when he is otherwise unwell, he should be isolated, as these are ease.

the symptoms of the common communicable diseases. This might be called voluntary isolation. It is very simple; the child remains in bed, and no one goes into his room excepting his mother or the one other person who is looking after the child.

There is no danger in merely going into the room, but if others are allowed in, they will likely want to play with and fondle or kiss the sick child, who probably does not feel particularly ill and who would, therefore be only too glad to play. The whole danger lies in the patients' secretions, and usually this is limited to the secretions from the mouth, nose and throat. These are dangerous, because it is in them that the germs of the common communicable diseases leave the body.

Practically, the danger can be avoided if the person who is looking after the child keeps away from his face; by this means, that she does not kiss the child or come in the line of fire of his coughs and sneezes. Also, she should keep her hands away from her own face, scrub her hands with soap and water and a nail-brush every time she leaves the patient's room, and boils all cups and dishes used by the patient. These measures will prevent the spread of disease in the home. At the same time, keeping the child in bed is the best form of treatment.

It is also worthy of mention though the lot fed whole grain were decidedly lacking in finish, they were well grown, were that at the end of 91 days plump in appearance, and were of good bacon type, indicating

\$36,000 Go To Beet Growers

REMEMBRANCE DAY WILL BE CIVIC HOLIDAY

A motion is being passed by the Council declaring Monday November 12th, Remembrance Day, as a Civic Holiday, and notice to this effect from the Mayor and Council will appear in next week's Recorder.

In the meantime this notice is given so that all may prepare accordingly. It is expected that all places of business in the town will be closed, and we understand a Veterans Banquet and Public Dance will be held in the Opera House.

BOARD OF TRADE, MONDAY NOV. 5th.

The monthly meeting of the Raymond Board of Trade will be held Monday, November 5th, at 8:15 in the Town Hall. A report of the Stampede which was postponed until now, and other accumulated business will be discussed and disposed of, and a full attendance of members is requested.

Remember the time and the place and the date.

GROUND VS. UNGROUND GRAIN FOR HOGS

An experiment to ascertain if it is profitable to grind grain for hogs was carried out by the Dominion Experimental Station, Lacombe, Alberta, with fall pigs during the fall and winter of 1932-33 and 1933-34, and with spring pigs during the summer of 1933. A total of 10 pigs of purebred Yorkshire and Tamworth breeding and the crosses of these two breeds, averaging 86 pounds in weight at the commencement of the test, were used in the three experiments. Both lots were self-fed the same basic ration consisting of oat and barley, the only difference being that one lot was fed whole grain and the other lot finely ground grain. Buttermilk was supplied to each lot once daily as well as all the water they wished to drink.

Based on the three-year average, the pigs fed ground grain made appreciably more rapid gains than those fed whole grain. While the pigs fed whole grain grew at the rate of only 0.93 of a pound per day, the pigs fed ground grain made 1.22 pounds daily, or an increase of 31 per cent.

Starting with 86 pound pigs it took 91 days for the ground grain fed lot to obtain an average weight of 200 pounds, while 109 days were required for the lot fed whole grain. It was also necessary to put the whole grain fed lot on ground grain for the last 18 days in order to put on the proper finish for market. Besides the extra 18 days, it required 143 pounds of ground grain per hog to produce the proper finish demanded for select bacon hogs.

Under the conditions of this experiment, the cost of feed to produce one hundred pounds of gain was in favour of the whole grain fed lot. It would seem, therefore, that in times of low prices for grain and hogs one might be justified in self-feeding hogs weighing approximately ninety pounds a ration of whole grain until they have attained a weight of approximately 170 pounds, when they should be finished for market on ground grain.

It is also worthy of mention though the lot fed whole grain were decidedly lacking in finish, they were well grown, were that at the end of 91 days plump in appearance, and were of good bacon type, indicating

Cheques totalling \$360,000 went into the mails today for sugar beets delivered to the Factory up to and including October 15th, and this melon will be split between the 800 growers scattered throughout Southern Alberta. The deliveries this fall were light because of the bad roads, but subsequent payments will be correspondingly heavy, as the heaviest tonnage of beets ever harvested, are being taken off this year, reports from districts where digging is finished, showing average yields of from 2 to 7 tons per acre heavier than ever before. Some interesting figures will likely feature the completion of the digging and hauling.

GEO. C. MUNNS HONORED

Honoring the 81st birthday of her father, Geo. C. Munns, Mrs. A. L. McMullin entertained Saturday afternoon, October 27th, when quite a number of old friends of Mr. Munns visited at the McMullin home, and renewed acquaintances, and talked over old times, greatly enjoying the afternoon.

Mr. Munns was the first man to bring his family to Raymond in the early days and he justly takes a great deal of pride in this fact. He is spending an extended vacation with his son-in-law, daughter and family here in Raymond.

We extend our wishes for many more years of health and strength for this veteran of our town.

WEDDING BELLS

MELCHIN — MEHEW

Howard Melchin, eldest son of Mr. and Mrs. Arthur Melchin, and Miss Mona Mehew, youngest daughter of Mr. and Mrs. L. J. Mehew, were married in the Temple Wednesday afternoon, in the presence of members of both families and a host of friends with President Edw. J. Wood performing the ceremony. The young couple will make their home in Raymond, where the groom is employed in the local Safeway Store. They are both popular young people and will have the best wishes of their many friends for a long and happy married life.

\$110,000 LAND DEAL

HUTTERITES BUY 11,000 ACRES NEAR CHIN

Purchase by the Hutterite Brethren of some 11,000 acres of land in the Chin district, east of the city, was recently concluded. The lands involved include some 5,500 acres bought from O. B. Lassiter. This is property acquired by Mr. Lassiter from R. C. Harvey, Lethbridge sheep rancher, last spring and which he broke up preparatory to cropping. This land was sold to the Old Elm Colony of Bradshaw.

Another block of 5,500 acres of raw lands, belonging to the Canadian Pacific Railway was also sold to the Hutterites, this tract going to the Wolf Creek Colony Stirling.

It is planned to improve the property, locating two colonies on the new holdings. It is understood that about \$110,000 was involved in the transactions.—Lethbridge Herald.

the possibilities in this method of feeding for the growth and development of gilts to be retained for breeding purposes only.

H. E. Wilson, Dominion Experimental Station, Lacombe Alta.

News Notes

Mr. and Mrs. Jas. Hamling and Mr. and Mrs. Moyle Peterson of Terrill's Lake spent Sunday afternoon in Raymond with friends.

The weather Monday morning was cold and raw for several hours before the sun broke through the clouds and things warmed up a bit.

Several court cases were heard on Tuesday by Magistrate Low, and Solicitor Ostlund, K. C. of Lethbridge was here on legal business.

The fire engine answered a call to the farm of H. Hironaka on Monday, when a fire started in his house. Quick action on the part of the family and the brigade prevented any damage of consequence.

EXPLANATION

Owing to a breakdown in our newspress we are somewhat later than usual this week. We hope our readers will bear with us in our lateness.

Advertising rates on application

TIME IS ROLLING ON

We want to call attention again to our Subscription offers now on. There is only two more weeks when the 25% reduction can be allowed. After that we will be back on the \$2.00 per annum rate for subscribers. The Magazine will be a small trick. The fact that there on that long, and it may not, we cannot say, and we would therefore advise those who desire to take advantage of this offer to act now.

Due to conditions, over which we have no control, it will be quite necessary that we make a real effort to clean up our subscription affairs. This fall, and as soon as our Special offer expires, we will be after your account.

Because of financial conditions and prevailing low prices of paper, we have been unable to carry on without saying very much about these accounts. This year, however, with a good wheat crop, and a phenomenal beet crop, we feel that we are entitled to our share, and we feel sure that our subscribers will assist us in this, and that is all we ask. It is to your advantage to come in and pay up, while you can take advantage of these

offers, and we can do this because of the expense we are spared in collection expenses. Help us out. We will appreciate it.

ANIMALS AT LARGE

During the past few weeks numerous complaints have been brought to us of farmers turning their hogs loose just as soon as they were finished, churning, and permitting these animals to run at large, hither and yon over the country, with out any consideration of the other people's wishes or conditions.

To say that this is not the right thing to do, is putting it mildly. It is a very mean and small trick. The fact that there is nothing in your field that they can harm is no reason why they should be permitted to run at large. A neighbor's fields. He may very likely be saving his feed for his own use, and certainly does not appreciate pasturing your hogs, which can do more damage in feed than any other animal because of their continual rooting and digging around.

Your responsibility of keeping them on your own premises. If you want to turn them out, visit your neighbors and ask them if they have any objections, and if they have, be man enough to keep them penned up, or else fence in your own farm so that they will have to stay on your land. True, a stubborn inflexible constancy and uniformity of life persisted in the practise of every human vice—excepting prodigality and hypocrisy; his insatiable avarice exempted him from the first and his matchless impudence

take care of your stock, and if they get away occasionally try and make it as rare as you possibly can.

EDITING A NEWSPAPER

To publish a newspaper requires the skill, the precision, the boldness, the vigilance, and the strategy of a commander-in-chief.

To edit a newspaper requires that one be a statesman, as essayist, a geographer, and, in acquisition, an encyclopedist.

To man, to govern, to prepare a newspaper until it shall be a fixed institution, a national fact, demands more qualities than any other business on earth.

If you feel like starting a newspaper, secular or religious, understand that you are being threatened with softening of the brain or lunacy, and then throwing your pocketbook into your wife's lap, start for some insane asylum before you do something so desperate.

Meanwhile, as dead newspapers are carried out week by week for burial, all the living newspapers give respectful obituary: telling when they were born and when they died. The best printer's ink should give at least one "stickful" of epitaph. If it was a good paper, say "Peace to its ashes!"

If it was a bad paper, I suggest the epitaph written: for Francis Charrtrouse: "Here cometh to rot the body of Francis Charrtrouse, who with an inflexible constancy and uniformity of life persisted in the practise of every human vice—excepting prodigality and hypocrisy; his insatiable avarice exempted him from the first and his matchless impudence

THE RAYMOND RECORDER

HONEY BREAD

The following recipe has been thoroughly tested and proved in the Central Experimental Farm kitchen at Ottawa: Honey Bread—two cups boiling water, two tablespoonfuls butter, two tablespoonfuls honey, one-half yeast cake dissolved in lukewarm water, six cups sifted flour and two and one-half teaspoonfuls salt. Put honey, butter and salt in a large bowl pour on boiling water when lukewarm add dissolved yeast cake and five cups of flour, then stir until thoroughly mixed, using a knife or mixing spoon. Add remaining flour, mix, and turn on a floured board, leaving a clean bowl; knead to mix ingredients until mixture is smooth elastic to touch and bubbles may be seen under the surface.

Some practice is required to knead quickly. Return to bowl, cover with a clean cloth and board or tin cover, let rise over night in temperature of 65 degrees Fahrenheit. In the morning cut down, toss on board slightly floured, knead to distribute air, shape into loaves or biscuits, place in greased pan, having pans nearly full. Cover, let rise again to double its bulk and bake in a hot oven. This recipe will make a loaf of bread and a pan of biscuits.

Announcing

A NEW FREE SERVICE TO PROTECT YOUR EYESIGHT

This is the Sight Meter, the clever new instrument that measures light, and tells you how much you need for any task. Let us protect your family's eyes by checking the lights in your home.

HOW much light do our eyes need for comfortable, easy seeing? Do any of us ever get enough light indoors?

The facts are alarming. Surveys have revealed that not one home in ten is well-lighted according to modern scientific knowledge. In many well-to-do homes today, children are actually becoming near-sighted because their parents do not realize how much light they need for studying!

To give you the benefit of this new know-

ledge about light and eyes, this company offers a new free service. Just telephone, and our expert will come out and measure your lights with a Sight Meter, the remarkable new instrument that measures light and tells exactly how much eyes need.

Your family's eyes deserve this free protection. But our supply of Sight Meters is limited. Our representative cannot make this free check-up unless you request it. Won't you phone us today?
